

term

dynein intermediate chain binding	
microtubule motor activity	
dynein light intermediate chain binding	
nucleoside diphosphate kinase activity	
microtubule binding	
ATP-dependent microtubule motor activity, minus-end-directed	
chaperone binding	
motor activity	
Hsp70 protein binding	
adenylate kinase activity	
dynein heavy chain binding	
protein-containing complex binding	
RNA polymerase II cis-regulatory region sequence-specific DNA binding, bending	
G-rich strand telomeric DNA binding	
MAP kinase serine/threonine phosphatase activity	
cytidylate kinase activity	
RNA polymerase II repressing transcription factor binding	
single-stranded telomeric DNA binding	
ATP-dependent microtubule motor activity, plus-end-directed	
glutathione-disulfide reductase activity	
cAMP binding	
protein-glycine ligase activity	
lamin binding	
ATP binding	
ATPase activity	
cation binding	
co-SMAD binding	
norspermine:oxygen oxidoreductase activity	
ADP-sugar diphosphatase activity	
ADP-ribosylarginine hydrolase activity	
adenosine-diphosphatase activity	
protein phosphatase inhibitor activity	
DNA nucleotidylxotransferase activity	
dynein light chain binding	
mannose-ethanolamine phosphotransferase activity	
drug binding	
Krueppel-associated box domain binding	
UDP-glucuronate 5'-epimerase activity	
racemase and epimerase activity, acting on carbohydrates and derivatives	
heparosan-N-sulfate-glucuronate 5-epimerase activity	
MAP kinase kinase kinase activity	
peptidase activator activity involved in apoptotic process	
phosphatidylcholine flippase activity	
flippase activity	
transcription corepressor activity	
phosphatidylinositol 3-kinase regulatory subunit binding	
calcium channel activity	
protein C-terminus binding	
nicotinate-nucleotide diphosphorylase (carboxylating) activity	
sphingosine hydroxylase activity	
glucosamine-6-phosphate deaminase activity	
calcium ion sensor activity	
peptidase inhibitor activity	
calcium-dependent cysteine-type endopeptidase activity	
DEAD/H-box RNA helicase binding	
[heparan sulfate]-glucosamine 3-sulfotransferase 3 activity	
protein serine/threonine/tyrosine kinase activity	
poly(U) RNA binding	
phosphatidylethanolamine flippase activity	
ErbB-3 class receptor binding	
heterotrimeric G-protein binding	
protein phosphatase activator activity	
MAP kinase tyrosine/serine/threonine phosphatase activity	
syndecan binding	
cGMP-stimulated cyclic-nucleotide phosphodiesterase activity	

MF  
ontology

term

cilium assembly
microtubule-based movement
cilium movement
cilium movement involved in cell motility
cell projection organization
inner dynein arm assembly
microtubule-based process
cilium organization
sperm axoneme assembly
centriole replication
nucleoside diphosphate phosphorylation
axonemal dynein complex assembly
regulation of brood size
negative regulation of inclusion body assembly
epithelial cilium movement involved in extracellular fluid movement
G2/M transition of mitotic cell cycle
nucleoside triphosphate biosynthetic process
cilium-dependent cell motility
regulation of G2/M transition of mitotic cell cycle
ciliary basal body-plasma membrane docking
UTP biosynthetic process
positive regulation of ATP-dependent microtubule motor activity, plus-end-directed
protein folding
regulation of cell projection organization
CTP biosynthetic process
flagellated sperm motility
GTP biosynthetic process
non-motile cilium assembly
negative regulation of BMP signaling pathway
non-canonical Wnt signaling pathway
microtubule anchoring at centrosome
male gonad development
axonemal central apparatus assembly
negative regulation of interleukin-2 production
regulation of actin filament polymerization
regulation of cilium movement
protein localization involved in establishment of planar polarity
regulation of organ growth
de novo centriole assembly involved in multi-ciliated epithelial cell differentiation
parathyroid hormone secretion
positive regulation of chromatin silencing
zygote asymmetric cell division
first cell cycle pseudocleavage
asymmetric protein localization involved in cell fate determination
negative regulation of calcineurin-NFAT signaling cascade
positive regulation of DNA repair
smoothened signaling pathway
negative regulation of NF-kappaB transcription factor activity
secondary heart field specification
regulation of transforming growth factor beta receptor signaling pathway
regulation of store-operated calcium entry
regulation of smoothened signaling pathway
negative regulation of phosphorylation
interstitial cell of Cajal differentiation
establishment of planar polarity
neural tube formation
positive regulation of glycogen biosynthetic process
motile cilium assembly
epithelial cilium movement involved in determination of left/right asymmetry
IDP catabolic process
ADP catabolic process
DNA modification
negative regulation of prostaglandin biosynthetic process
axoneme assembly
cellular glucose homeostasis
retinal cone cell development
intraciliary transport involved in cilium assembly
calcium ion import across plasma membrane
negative regulation of cAMP-dependent protein kinase activity
intracellular estrogen receptor signaling pathway
fin development
positive regulation of intracellular protein transport
natural killer cell mediated cytotoxicity
protein polyglycylation
intraciliary transport
glyoxylate cycle
cell aging
positive regulation of interleukin-10 production
hippo signaling
guanosine tetraphosphate metabolic process
regulation of intracellular estrogen receptor signaling pathway
transcription initiation from RNA polymerase II promoter
nucleobase-containing small molecule catabolic process
vagina development
negative regulation of protein localization to nucleus
convergent extension involved in axis elongation
positive regulation of non-canonical Wnt signaling pathway
post-embryonic hemopoiesis
planar cell polarity pathway involved in neural tube closure
Kupffer's vesicle development
negative regulation of sequestering of calcium ion
growth plate cartilage chondrocyte differentiation
determination of left/right symmetry
response to odorant
positive regulation of myoblast differentiation
thermospermine catabolic process
regulation of synapse maturation
heart looping
regulation of intraciliary retrograde transport
positive regulation of lysosomal protein catabolic process
protein localization to centrosome
positive regulation of adaptive immune response
erythrocyte differentiation
telomere capping
circadian regulation of gene expression
negative regulation of transcription by RNA polymerase II
regulation of transcription elongation from RNA polymerase II promoter
culmination involved in sorocarp development
cell communication
macrophage migration
metal ion transport
neutrophil chemotaxis
negative regulation of cell-matrix adhesion
primitive hemopoiesis
otic vesicle formation
response to X-ray
positive regulation of interleukin-4 production
negative regulation of oxidative stress-induced intrinsic apoptotic signaling pathway
regulation of protein secretion
chaperone cofactor-dependent protein rebinding
neurotrophic process
positive regulation of interferon-gamma biosynthetic process
caveola assembly
positive regulation of peptide secretion
positive regulation of myotube differentiation
negative regulation of insulin-like growth factor receptor signaling pathway
negative regulation of DNA demethylation
positive regulation of interleukin-1 beta secretion
positive regulation of oligodendrocyte progenitor proliferation
regulation of fungal-type cell wall biogenesis
cerebrospinal fluid circulation
establishment of endothelial barrier
macrophage chemotaxis
negative regulation of interleukin-12 production
cuticle pattern formation
determination of heart left/right asymmetry
2-oxoglutarate metabolic process
anterior/posterior axis specification, embryo
positive regulation of interferon-gamma production
cellular response to fibroblast growth factor stimulus
suppression by symbiont of host innate immune response
histone deacetylation
coronary artery morphogenesis
positive regulation of double-strand break repair via nonhomologous end joining
phospholipid efflux
calcium ion import
positive regulation of B cell proliferation
regulation of sorocarp stalk cell differentiation
hindgut morphogenesis
cellular response to macrophage colony-stimulating factor stimulus
neural tube closure
hermaphrodite genitalia development
positive regulation of cholesterol efflux
formation of primary germ layer
sphinganine metabolic process
preassembly of GPI anchor in ER membrane
N-acetylglucosamine catabolic process
glucosamine catabolic process
sulfate transmembrane transport
positive regulation of type 2 immune response
positive regulation of endocytosis
positive regulation of sequestering of calcium ion
white fat cell differentiation
epithelial cell development
regulation of mitochondrion organization
regulation of angiogenesis
cellular response to leukemia inhibitory factor
nuclear export
cartilage development
establishment of body hair planar orientation
intrinsic apoptotic signaling pathway in response to DNA damage by p53 class mediator
spindle assembly
rhombomere boundary formation
angioblast cell migration involved in selective angioblast sprouting
protein localization to ciliary transition zone
establishment of epithelial cell planar polarity
methionine biosynthetic process
negative regulation of neuron apoptotic process
positive regulation of neuronal action potential
embryo implantation
cellular response to cGMP
positive regulation of CD4-positive, alpha-beta T cell differentiation
cell-cell adhesion
enucleate erythrocyte differentiation
cellular heat acclimation
canonical Wnt signaling pathway
enteric nervous system development
neuron projection arborization
regulation of chloride transport
growth of a germarium-derived egg chamber
establishment of planar polarity of follicular epithelium
pronephros development
negative regulation of fibroblast growth factor receptor signaling pathway
calcium ion homeostasis
artery smooth muscle contraction
secretion
glucosylceramide biosynthetic process
regulation of microtubule-based process
positive regulation of cyclic-nucleotide phosphodiesterase activity
folate import across plasma membrane
nucleobase-containing small molecule interconversion
