

GO: Day 14 WGCNA MEblack

term

copper ion binding
inorganic anion exchanger activity
NADH dehydrogenase activity
RNA polymerase II repressing transcription factor binding
triose-phosphate isomerase activity
pheromone activity
ferric-chelate reductase activity
cysteine-tRNA ligase activity
transmembrane receptor protein tyrosine kinase adaptor activity
phosphatidyl-N-methylethanolamine N-methyltransferase activity
glucose-6-phosphate isomerase activity
phosphoenolpyruvate carboxykinase (GTP) activity
transketolase activity
inositol 1,4,5-trisphosphate-sensitive calcium-release channel activity
glutamine-tRNA ligase activity
6-phosphofructokinase activity
methylmalonate-semialdehyde dehydrogenase (acylating) activity
malic enzyme activity
protein serine/threonine phosphatase inhibitor activity
iodide peroxidase activity
2-acylglycerol O-acyltransferase activity
L-alanine:2-oxoglutarate aminotransferase activity

MF

ontology

term

acrosome assembly
spliceosomal tri-snRNP complex assembly
tRNA N1-guanine methylation
ameboidal-type cell migration
mRNA processing
deadenylation-dependent decapping of nuclear-transcribed mRNA

BP

ontology
